

LANDSCAPING CHANNEL LINER APPARATUS

ABSTRACT OF THE DISCLOSURE

5 A landscaping channel liner apparatus is provided having a longitudinally-
extending trough and longitudinally-extending receptacles. The longitudinally-extending
trough has a longitudinally-extending floor located between opposed longitudinally-
extending side walls extending therefrom. The longitudinally-extending trough also has
first and second opposed transverse open ends formed from the floor and side walls.
10 Each of the side walls defines a longitudinally-extending edge located opposite the
longitudinally-extending floor. A longitudinally-extending receptacle is located on each
longitudinally-extending edge and includes first and second transverse open ends.
